Conclusion/Brief comment:

Planning permission is sought to demolish, reconfigure and extend a terrace and external staircase to the south and east elevation, to install a rooflight in the south facing roof slope, alterations to the fenestration, to install a new gate and remove existing satellite dish and concrete base.

The proposed alterations are of an appropriate scale, mass and form so as not to detract from the openness of the surrounding area. The design of the alterations and the materials to be used will be in-keeping with the existing dwelling and will not negatively impact on the character or appearance of the surrounding area.

The property is well screened by a mixture of fences, granite walls and hedgerows and the alterations proposed would not have any significant impact on the amenities of the neighbouring properties to the north, northeast and northwest with regard to sunlight, daylight or loss of privacy.

The proposed replacement gate is in keeping with the character and appearance of the street-scene and would not negatively impact on the visual amenity of the area.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

For the reasons contained within this report it is considered that the proposal accords with the above mentioned Policies of the Island Development Plan.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
