Conclusion/Brief comment:

The application is for the erection of an 8m x 5m garden room to the south (rear) boundary of the property. The rear of the property forms the boundary of the private access road and is screened by a high conifer hedge, shrubs/landscaping and an open detailed block cavity wall circa 1.2m high. The development would therefore at present be screened from view from the access road. Although the development would be evident from the private access road should the landscaping be removed, the siting of the property behind the road frontage (public area) would ensure that there would be limited (if any views) from public vantage points, views only possible if accessing this or the other dwellings. Furthermore as this area of the garden provides the main amenity area, it is likely that the applicant would seek some form of enclosure to this boundary and therefore there are no concerns regarding visual impacts.

The orientation of the neighbouring properties and the proposed siting of the garden room in relation to these units would ensure that there is no significant impact on neighbour amenity.

Sufficient information has been submitted to satisfy GP9 Sustainable Development.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
