Conclusion/Brief comment:

This application is to erect a single storey extension to the west elevation and to vary the design of the pool house, excavate and erect retaining wall and external steps.

The variations to the previously approved pool house enlarge the structure to the west and omit the steps up to the garden and retain the walkway around the building as the existing pool house. By enlarging the pool house some excavation is also required.

The existing garage will be removed, and a single storey flat roof three bay garage and games room is proposed on the west elevation. The design and style of the proposed garage will match the enlarged pool house.

The pool house is to the rear of the main dwelling and therefore the changes will not be visible from any public vantage points. The front of the garage will make up part of the front façade of the dwelling, but it cannot be seen from the road due to a large amount of mature planting and hedging. Although planting cannot be considered as permanent screening, even if it was to be removed the views of the single storey garage would be minimal, given the set back from the roadside.

Therefore, the proposals are not considered to affect the character of the area, nor will they have any impact on any neighbour amenity.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
