Conclusion/Brief comment:

This application is to demolish the existing extensions and outbuilding and erect a large flat roof extension with a smaller flat roof first floor extension above, which is the same depth. Plus erect a summerhouse at the rear of the garden to replace the existing outbuilding.

The proposals achieve an adequate standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The proposals will be of limited visibility and the scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours. There is one window on the east side of the westerly neighbour, but it is a second window for a bedroom rather than a primary window and proposed at high level, therefore the impact is considered to be minimal.

The proposed rear summerhouse will have the same footprint as the existing outbuilding and therefore is not considered to impact on the neighbour amenity or affect the character of the area.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
