Conclusion/Brief comment:

This application is to demolish the existing porch and relocate and widen the front vehicular access.

The property already has a large vehicular opening to the south of the roadside boundary, exceeding 5m in width, with brick pillars and a granite wall. This application would like to move the vehicular access to the centre of the roadside boundary, extending the aperture to 6m, and rebuilding the granite wall either side and finishing with rebuilt brick pillars either side of the entrance.

The width of entrance would be extended by 1m to 6m, which is not unusual along this road and would not significantly increase the width of the opening over the existing situation. Although the property is not in a Conservation Area, there is one close by and so by rebuilding the granite wall either side of the entrance the overall street scene is preserved and therefore the proposal is considered acceptable.

The proposals will allow two cars to park at the front of the property, rather than one. The area of Fort Road that the property opens onto is long and straight and therefore vehicles have very good visibility, relocating the entrance would not affect the vehicle sightlines and the increase of one vehicle is not considered to affect highway safety, notwithstanding the absence of turning on site.

Due to the nature and type of development, it is not considered necessary for the applicant to demonstrate that the proposal has been designed to take into account the criteria of Policy GP9 (Sustainable Development).

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
