OFFICER'S REPORT

Brief Description of the site:

The property known as 'Maluca' is a mid-20th century bungalow which is set back from and faces north onto La Route du Braye. There are neighbouring properties to the east and west and across the road to the north. To the south is a reservoir and redundant vinery, which is allocated for housing in the Island Development Plan. The property is located in a Main Centre Outer Area as defined in the Island Development Plan (IDP).

Conclusion/Brief comment:

This application is to remove the front boundary hedge and erect a 1.1m high wall with the existing 4m wide access to remain.

The front boundary hedge is extremely overgrown, not in a particularly healthy state, is over 2m high and in some places over 2.7m wide.

La Route du Braye is classed as a Traffic Priority Route (in the Traffic Engineering Guidelines for Guernsey) and has many residential properties fronting onto it. More often than not the properties have low walls as their roadside boundary and not hedges, which are more consistent along rural roads rather than traffic priority routes.

The proposal to replace the hedge with a 1.1m high wall is considered appropriate in this instance because it will not alter or effect the character of the area. The proposals are not considered to have any detrimental impact on the neighbouring properties.

The finish of the wall will either be rendered and painted blockwork or stone block with rendered inside depending on the cost. Either finish will be appropriate, but a condition can be added to ensure details are submitted before work commences.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
