Conclusion/Brief comment:

This application is to erect an extension at first floor level, above the ground floor single side wing (once a garage), infill and install window at ground floor level to south (side) elevation.

Policy GP8 expects proposals to achieve a high standard of design which respects and where possible enhances the character of the environment. GP13 supports development where there are no significant adverse effects on the amenities of neighbouring properties. Both policies provide for a high degree of personal choice on design matters in less sensitive areas (outside of Conservation Areas and not affecting the setting of protected buildings).

Although the proposals detailing and cladding of the proposed extension does not relate particularly well to the period architectural character of the existing dwelling, in the context of the flexibility and support for personal choice under the IDP, it is nonetheless considered to achieve an acceptable standard of design, using lightweight materials which acknowledge the different ages of construction. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension is not considered to have a detrimental effect on the setting of the protected building to the east, nor on the character and amenity of the surrounding area. Neither will it have any impacts on any of the immediate neighbours.

Policy GP9, Sustainable Development, seeks to ensure all new development takes into account the use of energy and resources and any adverse impacts on the environment. There has been sufficient information provided with the application to comply with the requirements of this policy.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
