Consultations :

The Office of Environmental Health and Pollution Regulation, 22/09/2021

"I have reviewed the proposed plans for the installation of an air source heat pump which were received by post on 9th September 2021. I have concerns relating to the potential for noise nuisance to arise. Whilst it is noted that the proposed pump is to be situated a considerable distance from neighbouring properties the background noise level in this area is likely to be very low. To ensure that measures are in place to mitigate my concerns I would recommend that the following condition is attached to the consent:

- Noise associated with plant and machinery incorporated within the development shall be controlled such that the Rating Level, measured or calculated at 1-metre from the façade of the nearest existing noise sensitive premises, shall not exceed a level 5 dB(A) below the existing LA90 background noise level, including low frequency tones. Rating Level and existing background noise levels shall be determined as per the guidance provided in BS 4142:2014".
