Conclusion/Brief comment:

This application is for a variation to the previously approved scheme (ref: FULL/2021/1018) to erect a single-storey extension, alter roof form to garage, alteration to 1st floor window to north (front) elevation and install cladding. The

variation is to enlarge the front bedroom from 7.31sqm to 12.96sqm, by extending the front wall 1.3m, still retaining the same roofline.

The extension to the previously approved application is minimal in terms of the appearance of the front façade and there are no concerns regarding the design of the proposals.

The scale and massing of the proposal is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impacts on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
