Conclusion/Brief comment:

This application is to demolish the existing conservatory and mono-pitch rear east facing extension and the existing shed. Erect a single story flat roof extension to the east elevation and erect a larger shed in the same location, far southeast corner of the site.

Part of the application is to raise the north boundary wall to match the height of the east boundary wall, which would ensure that the whole of the rear of the property was screened from the road, which runs past the eastern boundary. The raising of the wall is considered appropriate in this location, as the property forms a corner plot and high walls are part of the local character.

The new rear extension and shed are located to the rear of the property and so would not be seen from any public vantage points. The proposals achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension and shed are not considered to have a detrimental effect on the character and amenity of the surrounding area, or on the special interest of the protected buildings setting, nor will it have any impact on either of the immediate neighbours.

Policy GP9: Sustainable Development seeks to ensure all new development takes into account the use of energy and resources and any adverse impacts on the environment. There has been sufficient information provided with the application to comply with the requirements of this policy.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
