Conclusion/Brief comment:

This application is to erect a balcony at first floor level on the front elevation of the dwelling. Access will be gained from changing an existing window to a single door.

The main views will be to the southwest over the access road and entrance to the property. The neighbour to the southeast is 15m – 20m away and the high boundary wall limits overlooking in this direction and the overlooking would be no more than from the first floor rooflights along the same elevation. Views to the neighbour to the northwest, would be of the front garden rather than the rear amenity space, so overlooking a more public part of the curtilage is not considered detrimental to the amenity.

The nearest neighbour to the south faces northwest and shares the same access road. From photos submitted taken from the first floor, the balcony would look over the neighbour's driveway and front garden, but with the high boundary wall overlooking would be limited, and due to the orientation of the buildings there would be no ability to look into any of the neighbour's windows.

The design of the balcony is not considered to have any effects on the character of the area and it would not have any detrimental impacts on the neighbours' amenity.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
