OFFICER'S REPORT

Brief Description:

The application proposes the installation of stainless steel netting to stabilise the bank above Ladies' Pool, La Vallette.

The site is located in the Main Centre Outer Area, Conservation Area and Harbour Action Area as designated in the Island Development Plan.

Conclusion/Brief comment:

Following permission being granted for a granite retaining wall (ref: FULL/2021/0932), a further review by specialist geotechnical engineers confirmed that it would be prudent to also secure the steep bank above this retaining wall. A light gauge netting (formed from steel wire approx. 4mm diameter) is proposed and which has been stated to provide adequate protection. This should not impede the regrowth of vegetation, and most of the netting will be concealed by this growth.

With regard to the visual impact of the works proposed it is noted that existing vegetation will grow through the proposed netting in order to reduce the impact of the development on the character and appearance of the Conservation Area. These remedial measures will address public safety concerns regarding the safety and

stability of the section of bank proposed. The use of such netting is common in situations such as this, and the proposal is considered to satisfy the aims of the relevant policies in the Island Development Plan referred to above.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.

The application is acceptable in relation to the above policies and other material planning considerations. In view of the above it is recommended that planning permission is granted for the proposed work.
