OFFICER'S REPORT

Brief Description of the site:

The application site comprises a large detached dwelling-house and features a detached garage, shed and self-catering unit to the south. The property is located Outside of the Centres as defined in the Island Development Plan.

Planning permission is sought to demolish the existing garage and shed, and erect a replacement single storey flat roof garage. 16 solar panels will be positioned on the roof of the garage.

No changes will made to the self-catering unit, although the proposed garage will abut both the east and north sections of the unit and thereby reducing the amount of daylight to one of its windows.

PAPP/2009/0746	Demolish self-catering unit, garage and shed; erect garage / changing area and install swimming pool.	Granted

Conclusion/Brief comment:

Policy GP13 (Householder Development) states that proposals for the alteration and/or extension of residential properties within the residential curtilage, will be supported where there are no significant adverse effects on the amenities of neighbouring properties; the design, scale, mass and form would not detract from the open character of open locations; and they do not affect the special interest of Conservation Area, Area of Biodiversity Importance, protected building or protected monument.

In this instance Policy GP8 (Design) is also relevant. In addition, the preceding text to this policy refers to the need to consider the material planning considerations as specified in Part IV, Section 13 of the Land Planning and Development (General Provisions) Ordinance 2007. These include the appropriateness of the development in relation to its surroundings in terms of its design, layout, scale, siting and the materials to be used, as well as its likely effect on the character and amenity of the locality in question and its likely effect on the reasonable enjoyment of neighbouring properties.

The proposed position of the garage will be broadly the same as the existing garage and shed, and together with its limited scale the proposal will not be highly visible in public views as it will be set behind the self-catering unit. Consequently, the proposed garage achieves a good standard of design (Policy GP8 – Design) in terms of its scale, mass, form, siting and materials.

The incorporation of solar panels above the proposed garage is a welcomed addition to the scheme with regards to Policy GP9 (Sustainable Development), and would not lead to any undue harm despite the number of PV panels.

The loss of light to one of the windows serving the self-catering unit is acceptable when taking into account the remainder of windows serving the building.

The proposal will not have any significant effects on neighbour amenity.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.

Based on the above, the application is considered compliant with the relevant Island Development Plan policies; it is therefore recommended that planning permission be granted, subject to conditions.
