OFFICER'S REPORT

Brief Description of the site:

The application site is located Outside of the Centres as defined in the Island Development Plan.

Planning permission was originally sought to remove a section of hedging to the front of the site and erect a replacement low, granite effect, roadside wall. Permission was also required to widen the vehicular access.

Concerns were raised with regards to the suitability of the materials proposed and its effect on the surrounding character and appearance of the locality.

The agent has amended the scheme and incorporate a low natural granite wall along the roadside boundary in attempt to overcome the concerns raised. It is also noted on the revised drawings that the existing vehicular access width 4500mm.

Comments:

La Societe Guerneslaise:

In respect of this application, we would like to highlight that all types of hedges support nesting birds and other wildlife.

If the application is approved, we would request that the removal of the hedge be undertaken outside of the main bird breeding season (March-July inclusive). If removal during the bird breeding season is considered essential, then we would recommend that the hedge is inspected for current or recent use by birds (and other wildlife) by a suitably qualified person prior to removal. This would reduce the risk of disturbing or destroying animals which are protected under the Animal Welfare Ordinance 2012.

We would request that an informative note be added to the Information Sheet as follows -

'Your attention is drawn to the Animal Welfare (Guernsey) Ordinance 2012 and the 2020 Strategy for Nature, and the need to comply with their provisions. The hedge may be used by nesting birds or other wildlife. You are therefore requested to remove the hedge outside of the main bird breeding season (March-July inclusive). Conclusion/Brief comment:

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.

In light of the amendments secured, the replacement roadside boundary wall and hedge adopts a satisfactory standard of design which respects the boundary treatments adopted in the wider area, and will not have an undue effect on visual amenity, the surrounding built environment, or the amenities of neighbouring residents.

Despite some ambiguity surrounding the access width of the property given that it was shown as 4000mm on the original submission and 4500mm wide of the revised application, incorporating a 4500mm wide access in this locality would not have any detrimental effect on highway safety, landscape character or visual amenity. It is reasonable to attach a condition to the decision to avoid any discrepancy in the drawings submitted and for the avoidance of doubt.

Based on the above, the application is considered compliant with the relevant Island Development Plan policies; it is therefore recommended that planning permission be granted, subject to conditions.
