Conclusion/Brief comment:

This application is to demolish the chimney, extend and alter at ground, first and second floors, and erect a one and a half storey extension to the southeast elevation of the existing detached garage.

The proposals are small and will not greatly alter the appearance or scale of the dwelling and the garage will be enlarged. The proposals achieve a good standard of design, using materials which complement the existing materials. The proposals will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the proposals are not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will they have any impacts on any of the immediate neighbours.

Policy GP9, Sustainable Development, seeks to ensure all new development takes into account the use of energy and resources and any adverse impacts on the environment. There has been sufficient information provided with the application to comply with the requirements of this policy.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
