Conclusion/Brief comment:

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.

The building was substantially renovated to enable its conversion to flats at upper level and retail use at ground floor level circa 9 years ago. The insertion of a 78cm x 55cm roof light above the staircase is a requirement of the fire service to allow for ventilation within the staircase in case of a fire. The roof light would be sited within the north east roof slope where a further roof light and dormer are also sited. The

roof light would not be overly evident within the surrounding area. The development for the above reasons is also acceptable within the protected building.

The application is acceptable in relation to the above policies and other material planning considerations.
