Conclusion/Brief comment:

This application is to erect a car port with a first floor extension above to the southeast elevation.

The proposed first floor extension matches the main building with a small front pitched dormer and has a larger dormer to the rear. The proposals provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The new northeast facing first floor window will overlook the neighbour's garden, but it is no worse than the overlooking from the existing first floor Juliette balconies.

Public views of the proposed rear dormer from Bouverie Lane are over 40m away and so the impact is minimal. Therefore, the scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours

Policy GP9, Sustainable Development seeks to ensure all new development takes into account the use of energy and resources and any adverse impacts on the environment. There has been sufficient information provided with the application to comply with the requirements of this policy.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
