Conclusion/Brief comment:

This application is to install recycled railings to the top of the roadside boundary wall, erect a low level wall within the front parking area to create a bin store, with hedging planted around the outside of the wall. Erect external steps from the bin store area down to the adjacent track which runs along the northeast boundary.

The front boundary wall is not part of the Protected Building listing and therefore the removal of part of the northeast wall to install pedestrian steps is not considered to impact on the special quality of the surrounding conservation area or on the special interest of the protected building.

The bin store design is considered appropriate and will be naturally screened by a new hedge, this element of the application is deemed acceptable and complies with the relevant policies.

The wrought iron railing to be installed on the front boundary wall will be in keeping with other nearby properties and is considered appropriate in style and age to enhance the setting of the protected building.

The proposals are not considered to have a detrimental effect on the character and appearance of the surrounding conservation area, the setting of the protected building or impact neighbour amenity.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
