Conclusion/Brief comment:

This application is to erect a single storey flat roof extension to the rear, raise the flat roof on the existing garage and convert to additional accommodation, enclose the porch on the southwest corner of the dwelling and infill the front central section of the dwelling. Install three rooflights to the front roof slope and some alterations to fenestration. Increase the width of both vehicular entrances from 2.7m to 3.5m.

The proposals achieve a good standard of design, using materials which complement the existing materials and updating the front façade of the building to give a modern appearance. The extension to the rear will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the proposed works are not considered to have any detrimental effects on the character and amenity of the surrounding area, nor will they have any impacts on either of the immediate neighbours.

The front roadside boundary is approximately 28m and at present the vehicular accesses are 2.7m wide, which is considered small for the size of modern vehicles. The proposal to increase the widths to 3.5m is considered appropriate in this case as it still leaves 21m of front roadside boundary. The changes will not affect highway safety in any way.

Policy GP9, Sustainable Development, seeks to ensure all new development takes into account the use of energy and resources and any adverse impacts on the environment. There has been sufficient information provided with the application to comply with the requirements of this policy.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
