Conclusion/Brief comment:

This application is to demolish the existing outbuilding and rear extension and erect a two storey rear extension. Raise the existing roof to allow for first floor accommodation.

Policy GP8 supports multi-level development, and raising the roof to accommodate first floor living is considered appropriate.

The proposals achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours. The rear first floor windows are at a sufficient distance to not cause any detrimental effects on neighbouring amenity. The windows on the north elevation are shown on the plans to be opaque glazing, which is considered appropriate for bathrooms, a condition will be added to ensure the correct opacity is installed.

Policy GP9, Sustainable Development, seeks to ensure all new development takes into account the use of energy and resources and any adverse impacts on the environment. There has been sufficient information provided with the application to comply with the requirements of this policy.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
