Conclusion/Brief comment:

It is a requirement under the Land Planning and Development (Guernsey) Law, 2005, when considering applications affecting protected buildings, to secure so far as possible that the special historic, architectural, traditional or other special characteristics (including setting) are preserved.

The chimney pot, doorway opening and internal works relate to low value elements of the building and will not result in unacceptable harm to the fabric and special interest of the Protected Building. The works to replace the roadside wall is a reasonable aspiration of the property owner. The scheme therefore accords with the requirements of Policy GP5. It is reasonable however, to impose a condition regarding the rebuilding of the wall and requiring details of any new vent/extracts proposed to serve the WC/boiler room.

The works proposed represent a good standard of design that respect the locality. The proposals will not result in harm to the amenities of surrounding occupiers and meet the aims of Policies GP8, GP9 and GP13 of the Island Development Plan.

With regard to Policy GP9: Sustainable Development, it has been demonstrated that the proposed development will comply with Building (Guernsey) Regulations 2012 and therefore has taken into account the use of energy, resources and any adverse impact on the environment.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.

In view of the above it is recommended planning permission is granted for the proposed development.
