OFFICER'S REPORT

Brief Description of the site:

The property known as 'Qila' is a large detached 1970's bungalow built in an inverted L shape and sits in the middle of its plot. York Way runs along the west boundary with the vehicular entrance at the north end of the west boundary. The dwelling essentially runs north/south with a west wing housing the garage and main entrance, there is a conservatory added to the south elevation. There are other detached neighbours to the north and south and across the road to the west and at a lower ground level to the east.

The property is located Outside of the Centres as defined in the Island Development Plan.

Conclusion/Brief comment:

This application is to demolish and rebuild the west wing a little larger, remove the conservatory and erect a more substantial garden room and erect a small, hipped roof extension at the north end of the east elevation to increase the size of two of the bedrooms. Add a flue to the new south garden room extension and a new remote control front gate across the vehicular entrance.

The proposals will modernise the building, and are considered to achieve a good standard of design, using materials which complement the existing materials. The extensions will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extensions and additional flue are not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will they have any impacts on any of the immediate neighbours.

The scheme proposes replacing the existing double garage in the existing west wing with a slightly larger garage in the replacement west wing, thus keeping the same amount of parking as already exists. The new gate will be custom made to replicate the neighbouring gate to the north and will be similar to other entrance gates which can be seen in the surrounding area of St George, and the installation is not thought to alter the character of the area or impact on neighbour amenity.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
