Conclusion/Brief comment:

This application is for a detached timber frame double garage in the southwest of the house, a two storey extension to the rear of the property and a single storey orangery to the southeast of the property. Some alterations to the existing parking area and some alterations to the west elevation fenestration.

The proposals achieve a good standard of design, using materials which complement the existing materials. The extensions will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extensions are not considered to have a detrimental effect on the character and amenity of the surrounding area, because apart from the garage, they will not be seen from any public vantage points, nor will they have any impacts on either of the immediate neighbours, due to the distance between them and the topography of the land.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
