Conclusion/Brief comment:

The application is for the demolition of a brick chimney and its rebuild to incorporate lead trays. Although no details of the rebuild have been submitted providing that the decision is conditioned to require the rebuild to be on a like for like basis matching the precise detailing of the existing chimney and utilising the existing bricks, the application would not have a significant impact on the protected building or the conservation area. However, should the existing bricks not be able to be reused a condition requiring the submission of brick samples would also be reasonable. This would also ensure that the proposal would have no significant impact on the protected building or conservation area.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
