Conclusion/Brief comment:

This application is to erect a one and a half storey extension, with balcony at first floor level, to the west (side) elevation and install two rooflights in the north (front) roof slope.

The extension will have a lower ridge than the main house and so will be subservient to the main dwelling, the first-floor balcony is recessed and looks west, towards the coast and over the open land to the southeast. Overlooking into the neighbours garden to the south would be oblique and not considered to have an adverse impact on neighbour amenity.

The proposals achieve a good standard of design, using materials which complement the existing materials used. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation. The ground floor bedroom window is 2m from the boundary and unlikely to result in overlooking and could be managed by exempt boundary treatments. The glazing would not be required to be opaque.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours.

Policy GP9, Sustainable Development, seeks to ensure all new development takes into account the use of energy and resources and any adverse impacts on the environment. There has been sufficient information provided with the application to comply with the requirements of this policy.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
