Conclusion/Brief comment:

This application is to demolish the rear single storey extension and erect a two storey extension to the north rear elevation and a single storey flat roof garage extension to the west side elevation and alter the bathroom window at first floor level on the front south elevation.

The proposals achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new rear extension is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours.

There was some concern that the proposed amount of private amenity space for the property would be too small with the proposed scheme. However, there is no minimum standard for outdoor amenity spaces and after a deferral the applicant has changed the west facing kitchen window to bi-fold doors, in addition to the bi-fold doors in the dining room, which increases the ability for indoor/outdoor living, therefore the concerns have been alleviated.

There is a first floor southwest facing window in the extension which overlooks the neighbours small back yard. The window services a bedroom, which already has a northwest facing window, therefore the southwest facing window can become a fixed closed opaque window to prevent overlooking.

Reducing the window at first floor level at the front of the house will bring symmetry to the front of the building and the single storey garage addition to the side of the property is not considered to alter the character of the area and it will not impact on neighbour amenity.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
