Conclusion/Brief comment:

This application is to erect a retaining boundary wall at the north side of the vehicular entrance, removing an old planter and slightly widening the entrance.

At present the north side of the vehicular opening comprises a square and damaged dry stone granite wall with shrubs and bushes growing. The proposals mirror the south side of the entrance built in 2011.

The proposals will improve highways safety by providing a bell mouth to the north side of the entrance. The proposals will improve the appearance of the property as a whole and are not thought to alter the special quality of the surrounding conservation area, nor will they have any detrimental impacts on the neighbours' amenity.

Due to the nature and type of development, it is not considered necessary for the applicant to demonstrate that the proposal has been designed to take into account the criteria of Policy GP9 (Sustainable Development).

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
