Conclusion/Brief comment:

This application is to erect a single-storey flat roof extension with a first-floor balcony and external staircase to reach it, to the rear/north elevation of the dwelling.

The proposals will add a dining room to the living space, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

GP13 advocates less prescriptive control will be applied for householder development, providing householders with greater freedom of choice with regard to private property development and use. The main reason for the balcony would be to watch the planes coming and going from the airport. The property is on the very fringe of the built environment with the north elevation surrounded virtually on all sides by open land, with the airport beyond, which means there is no overlooking to or from the balcony. The extension and balcony would not be seen from any public vantage points.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impacts on any of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.
