Conclusion/Brief comment:

This application is for a one and a half storey extension to the west/side elevation and a dormer with a Juliet balcony and rooflights to the east facing roof slope. The application was deferred to allow the applicant to re-design the Juliet balcony because the modern style of the proposed Juliet balcony would be visible from the road and would not suit the style of the rest of the building.

The Juliet balcony, as amended, is a flat roof dormer with a casement window and timber cladding below, which is more appropriate for the age and style of the building.

The proposals achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area as it is at the rear of the property. The proposals are not considered to have any impacts on any of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
