Conclusion/Brief comment:

This is a part-retrospective application to demolish a section of roadside boundary wall to widen vehicular access.

Rue du Rocher runs past the dwelling and is not a very wide road, the existing vehicular entrance is 3.3m wide, which means some vehicles struggle to enter in one manoeuvre, which is not ideal. The proposal is to remove a 1.7m section of the roadside boundary wall.

At present there is a front boundary render wall which runs along the front of the dwelling with a pedestrian gateway in the middle, lining up with the front door. The return wall on to the south of the property has been removed to allow cars to park at the front, and it is a section of this part of the front wall which is to be removed.

The majority of the front wall will remain in situ and the vehicular entrance to the property will be wide enough to allow all vehicles to enter and exit in one manoeuvre, which will improve highway safety.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
