Conclusion/Brief comment:

This application is to demolish the existing chimney and detached garage and erect a single storey extension to the east side of the dwelling, some alterations to the fenestration and erect a shed to the east boundary and widen the vehicular access.

The proposals achieve a good standard of design, using materials which complement the existing materials. The single storey extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impacts on any of the immediate neighbours. The two windows on the east elevation serve bathrooms and it is recommended that these windows are obscure glazed to minimise any privacy issues with the adjacent neighbouring property, this can be dealt with by condition.

Widening the access will improve the access to this plot, at present the entrance is only just over 3m, which is considered tight. The access opens on to the Carlton Estate road, rather than the busier main road, a wider entrance is considered appropriate and will improve highway safety.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
