OFFICER'S REPORT

Brief Description of the site:

The property known as 'Wellesley' is a detached pre-1900's dwelling, which was extensively extended at the ground floor in the 1970's. The dwelling is set back from and faces west onto Le Route de Sausmarez. There are neighbouring detached properties to the north and south, and across the road to the west. To the east is a larger estate.

The property is located Outside of the Centres, but is within the St Martins Conservation Area as defined in the Island Development Plan.

Conclusion/Brief comment:

This application is to demolish the existing pillars and a section of wall either side of the access to alter and widen the vehicular access by rebuilding the front boundary wall either side of the access in an arc with a new central automatic sliding metal gate.

The existing vehicular access between the pillars is 2.7m, which is considered narrow for today's vehicles. The proposal is to sweep the front boundary wall inward to create a bell mouth, with the gate setback into the site to allow a car to pull off the main road and wait for the gate to open. This will ensure the proposal does not impede the free flow of traffic.

There would still be plenty of room on site to turn a vehicle around and exit the site forward. The new visibility splay allows for a 33m sight line in each direction, which is a vast improvement to highway safety over the existing access.

The design of the new entrance uses material which complements the existing, using white rendered walls near the gate to mimic the existing white pillars. The scheme also provides a dedicated bin store area, a built-in post box and a pedestrian access along the south side of the new gate.

The scale and massing of the scheme is not considered to have a detrimental effect on the special quality, character and amenity of the surrounding conservation area, nor will it have any impact on any of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
