Conclusion/Brief comment:

This application is to convert the bunker in the garden to a home office/store and erect a raised decking area above the bunker which is located on the southeast boundary.

The top of the bunker is approximately 600mm above the ground level. A high granite wall runs along the south boundary of the site, which will shield the development from the southern neighbours. The granite wall reduces significantly as

it runs along the east boundary and at present the neighbour's garden to the east is greatly overlooked.

The proposal shows a 1.8m high rendered wall set approximately 1.2m away from the east boundary, over half a metre inside the granite wall. This inset will lessen the impact of the wall, reducing the amount of shadowing in the neighbours garden and allowing for maintenance of both walls in the future.

Due to the location of the bunker there is sufficient distance between the new neighbouring gardens to limit overlooking to an acceptable level.

The bunker is not a Protected Monument and is within the domestic curtilage, therefore it can be assessed as a domestic outbuilding and converting the bunker to a home office and store does not require planning approval as the use is ancillary to the main house.

The rooflight does require planning permission, but it is serving an underground room and will not produce any overlooking. It is considered to comply with policy.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
