Conclusion/Brief comment:

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.

Alterations to existing industrial, storage and distribution and retail premises are supported by Policies OC3 and OC4 and provide a gateway for the proposed development.

The proposal seeks to remove existing concrete block wall forming part of the east boundary of the site and replace it with a 3m high timber sleeper wall positioned between vertical steel posts.

Due to its secluded position of the proposed works together with the design adopted, the proposal is not considered to have detrimental impact on the character of the area, visual amenity, or the amenities of neighbouring residents. The proposal achieves a higher standard of design when compared against the existing wall and is supported under policy.

Sufficient information has been submitted that has taken into account the criteria of Policy GP9 (Sustainable Development).

Based on the above, the application is considered compliant with the relevant Island Development Plan policies; it is therefore recommended that planning permission be granted, subject to conditions.
