Conclusion/Brief comment:

This application is to demolish the rear porch and chimney, erect a single storey extension to the southwest corner of the dwelling and alter the fenestration on both side elevations and rear elevation. The application also proposes to widen the vehicular access by 1.3m to 4.5m and alter the fenestration to the northwest elevation of the outbuilding.

The removal of the chimney is not considered to have an unacceptable impact on the appearance of the dwelling nor the character of the area, neither will the removal of the porch or the change in fenestration around the property.

The proposals achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours.

Widening the vehicular opening in this instance will provide a better and safer access for vehicles to come and go and IP9 is complied with.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
