Conclusion/Brief comment:

This application is to erect a single-storey extension, install external insulating render system to the west rear elevation and alterations to fenestration.

The proposals achieve a good standard of design, using materials which complement the existing materials. The external insulating render system will match the existing render. The rear extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new single-storey extension is not considered to have a detrimental effect on the special quality, character, and amenity of the surrounding conservation area, nor will it have any impacts on either of the immediate neighbours.

There is a window at ground floor in the north elevation, albeit in the pantry, this window is to be infilled. The other changes relate to timber windows in the rear elevation being replaced by double glazed timber windows. These alterations are considered acceptable, to be appropriate for the age and style of the building.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
