Conclusion/Brief comment:

This application is to extend and alter the rear flat roof dormer on the rear west roof slope and to install a captains dormer and two roof lights to the front east roof slope. The captains dormer will allow for a new shower room, whilst either side of the staircase the two bedrooms will be enlarged by enlarging the rear dormer.

The style and age of the property suits the style of a captains dormer, and its addition is not considered to affect the special quality of the surrounding conservation area. The rear flat roof dormer is to be replaced with a slightly wider flat roof dormer to enable the bedrooms to be a little larger.

The extended rear dormer is not thought to impact on the amenity of the neighbouring properties because the existing dormer has windows and access to a terrace and the new dormer retains the access whilst allowing a little more light into the rooms.

The proposals achieve a good standard of design, using materials which complement the existing materials. The dormer extension and captains dormer will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the proposed works are not considered to have a detrimental effect on the character and amenity of the surrounding conservation area, nor will they have any impacts on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
