OFFICER'S REPORT

Brief Description of the site:

The application site comprises a detached dwelling which is located within a Main Centre Outer Area as defined in the Island Development Plan.

Planning permission is sought to demolish and rebuild a roadside wall, infill an existing pedestrian access, and widen the vehicle access.

Following a recent site visit, the description has been changed to 'retrospective' given that part of the works have been carried out without consent.

Relevant History:

None germane to this application.

Conclusion/Brief comment:

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.

When 'reading' the roadside elevation as a whole, the proposed increase in width of the vehicle access is considered to be a reasonable aspiration of the homeowner (Policy GP13) and does not raise any significant issues with regards to the character

of the area, visual amenity, or the amenities of neighbouring residents. In addition, the increase in width of the vehicle access is partially offset by blocking up the pedestrian access to the front of the dwelling. A condition requesting that the works be undertaken in a timely manner is reasonable and necessary to ensure that the works are completed in the interest of visual amenity.

The proposal will not affect highway safety or traffic management.

Sufficient information has been submitted that has taken into account the criteria of Policy GP9 (Sustainable Development).

Based on the above, the application is considered compliant with the relevant Island Development Plan policies; it is therefore recommended that planning permission be granted, subject to conditions.
