Conclusion/Brief comment:

Policy LC5 (Retail in Local Centres) states that limited works to alter and/or extend existing comparison retail outlets will be supported provided that they are of a limited scale to provide for minor alterations to facilitate the continuation of the existing retail use at its current level of operation.

The principle of installing solar panels is acceptable under policy LC5.

Despite the extent of solar panels on the front elevation of the building and likely projection above the roof slope, the proposed development is likely to have a negligible effect on the character and appearance on the Conservation Area when viewed against the mix of building styles and forms in the locality. In addition, the principle of installing solar panels is encouraged under the provisions of Policy GP9.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.

The application is acceptable in relation to the above policies and other material planning considerations.
