Conclusion/Brief comment:

This application is to demolish the single storey rear (northeast) utility room and replace it with a two storey pitched roof extension, which would open up the ground floor to provide a larger kitchen diner, and provide a larger bedroom four and larger bathroom at first floor.

The proposals achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension is not considered to have a detrimental effect on the special character and amenity of the surrounding conservation area, the style of the extension suits the age of the existing property.

The proposals are unlikely to impact on the amenity spaces of any of the immediate neighbours, the two first floor windows face north and east, where the predominant view will be of roofs. To the north is the single storey workshop belonging to the property and to the east/northeast is the neighbouring property, any views to the private amenity space of that property are over 20m and therefore, although there is a small amount of overlooking it is not thought to be of a scale to warrant a refusal.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
