Consultation:

The Office of Environmental Health and Pollution Regulation's comments:

"I have reviewed the proposed plans for the installation of an electrical sub-station to the west boundary of the above site. I am concerned for the potential for noise nuisance to arise from the substation, which could affect neighbouring residential properties. I would therefore recommend that the following condition is attached to any issued planning consent:

- Noise associated with plant and machinery incorporated within the development shall be controlled such that the Rating Level, measured or calculated at 1-metre from the façade of the nearest existing noise sensitive premises, shall not exceed a level 5 dB(A) below the existing LA90 background noise level, including low frequency tones. Rating Level and existing*

background noise levels shall be determined as per the guidance provided in BS 4142:2014.

I would be grateful if this issue and condition are considered during the determination of this application.”

Conclusion/Brief comment:

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
