Conclusion/Brief comment:

This application is for the renewal of a previously approved application. The original application was to raise ridge height and erect a one and a half storey pitched roof and flat roof extension with a first floor terrace to create first floor accommodation to west (rear) elevation and infill windows to south elevation.

The resubmitted plans have not altered in any way from the previous application and the assessment from the previous report is still relevant;

'The proposed extensions and alterations are well designed and are well related to the existing dwelling. They are not largely visible from outside of the site and are not considered to have a negative effect on the character of the area.

The proposed extensions include a number of large openable windows/doors however they focus within the properties domestic garden, the effect on amenity is minimal.

The application also includes proposals to provide a number of roof lights at first floor level. The roof lights on the east and west elevations are in keeping with the character of the building and do not create overlooking. They are considered to be acceptable.

The proposed roof lights to the south elevation face a neighbouring property, however considering the separation distance and provision of existing boundary treatments the level of harm caused is not considered to be so sufficient to warrant the refusal of planning permission.'

On a recent site visit it was noted that there have not been any changes in the existing boundary treatments. Therefore the previous recommendation for approval still remains.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
