Conclusion/Brief comment:

This application is to erect an aluminium framed car port with clear polycarbonate roof to the north elevation of the detached garage, alter access to create gated pedestrian and vehicle access to south boundary and install a metal gate to the pedestrian access in the north boundary.

The pedestrian gate at the front/north of the property is considered to comply with the relevant policies of the IDP.

The car port would be seen by the two neighbouring properties, but it is not considered to impact on the neighbours amenity due to its lightweight structure. The car port is not considered to affect the character of the area due to its location.

The entrance pillars and gates to the south boundary are well designed and complete the newly built property. The height of the gates varies from approximately 1.2m – 1.7m, due to the access track sloping down from east to west, which is considered appropriate for the location, giving the property a degree of privacy without appearing unduly obtrusive. The works will not have a detrimental impact on residential amenity.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
