Conclusion/Brief comment:

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.

The proposed sign is appropriately positioned as its perpendicular to the road. The sign is double sided which makes full use of its location without the need for a separate sign elsewhere on the site, and combines multiple businesses.

The size, material and appearance is well thought-out and due to its low profile it does not substantially adversely interfere with sightlines when vehicles egress from the site, nor from the adjacent clos road known as Les Landes Clos.

Any partial obstruction from the clos road towards approaching traffic in a north-south direction (taken at 90cm above ground level) would not warrant grounds to refuse the application given the limited effect on sightlines above this measurement. An acceptable sightline towards oncoming traffic in a south-north direction achieved in this direction.

An informative regarding illumination should be attached as informative in the interests of visual amenity.

Overall, due to its position and design, the proposal will not have a detrimental impact on the character of the area, visual amenity, or the amenities of neighbouring residents.

Sufficient information has been submitted that has taken into account the criteria of Policy GP9 (Sustainable Development).

Based on the above, the application is considered compliant with the relevant Island Development Plan policies; it is therefore recommended that planning permission be granted, subject to conditions.
