OFFICER'S REPORT

Brief Description of the site:

The property known as '1 Les Blanches Cottages' is a small one and a half storey cottage which is attached to a slightly larger two and a half storey cottage (which was probably once the lower unit for the larger cottage). The two properties share the front parking area; the houses are set back from and face northeast onto La Route de Blanches. There are neighbouring properties in each direction. The property is located Outside of the Centres as defined in the Island Development Plan. The property is a Protected Building.

Conclusion/Brief comment:

This application is to erect a one and a half storey rear extension to the southwest elevation, install rooflights to the northeast front roof slope, some internal alterations and some alterations to fenestration.

The application is supported by a Statement of Significance (SoS), which includes a heritage Impact Assessment (HIA), which overall is a comprehensive document. Although there will be some impact caused by the erection of the one and a half storey extension, it will completely obscure the rear elevation and form of the Protected Building. Therefore, it is considered that the degree of effect will be higher than the neutral/slight set out in the HIA.

Nevertheless, it is considered that the degree of effect on the overall special interest of this protected building is outweighed by the reasonable aspirations of the property owner. Therefore the application is considered to comply with IDP Policy GP5.

The proposals achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area. Nor will it have any impact on either of the immediate neighbours, due to the position of the cottage in the landscape. The neighbouring property to the northwest is at a higher level and the first floor rooflights will look over the flat roof of the northwest neighbours garage and have a cill level of 1.7m, greatly limiting any views into their garden.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
