Conclusion/Brief comment:

This application is to demolish the chimney and existing flat roof extension and erect a slightly larger pitched roof extension to the rear, with a raised terrace area to the south. The application also relates to the application of an exterior insulating render system to the existing walls of the dwelling and some alterations to the fenestration.

The proposals achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours.

The raised terrace is 550mm, which is only just above the exempt height of a terrace, the terrace will have a 1.8m fence along the east side and the west boundary has an existing fence and planting to prevent overlooking. The terrace is not considered to impact on neighbour amenity and therefore is acceptable in this instance.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
