INFORMATIVES

OFFICER'S REPORT

Conclusion/Brief comment:

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.

The proposed development adopts a high standard of design for the purposes of Policy GP4 (Conservation Areas) when taking into account the size, form and materiality of the new and replaced dormer windows. The Cabrio balcony is also acceptable.

Despite its isolated and elevated position on the hillside, the proposed alterations will have a negligible effect on the Open Land, Conservation Area and visual amenity of the area when read against the existing building and surrounding mature vegetation.

Careful consideration has been given to the effect of the development on the amenities of neighbouring residents, particularly towards the development site to the south-east of the application site. The harm towards neighbouring residents resulting from the development will be limited when taking into account the distance and relationship to those properties.

Sufficient information has been submitted that has taken into account the criteria of Policy GP9 (Sustainable Development).

Based on the above, the application is considered compliant with the relevant Island Development Plan policies; it is therefore recommended that planning permission be granted, subject to conditions.
