Conclusion/Brief comment:

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.

The proposed extensions and alterations to the dwelling-house adopt a good standard of design for the purposes of Policy GP8 by virtue of their respective scale, form, massing, siting and materials.

The alterations to the existing extension, by increasing its height and size, will not lead to any undue effects on the neighbour's to the north with regards to overshadowing.

The distance between the proposed first and second floor floor fenestration (in addition to existing) in the northwest elevation of the dwelling and neighbouring property where the frontage area is given over to car parking along with existing boundary treatment is not considered to cause undue harm with regards to overlooking.

The extensions and alterations on the south-east elevation will be noticeable in public vantage points in the surrounding area however, the proposals would not lead to any adverse harm to visual amenity or the character of the area. Despite the extent of the first floor terrace and size of the dormer window, this aspect of the proposal would not lead to any neighbour amenity issues.

Sufficient information has been submitted that has taken into account the criteria of Policy GP9 (Sustainable Development).

Based on the above, the application is considered compliant with the relevant Island Development Plan policies; it is therefore recommended that planning permission be granted, subject to conditions.
