Conclusion/Brief comment:

This application is to remove the existing rear conservatory. Remove the existing flat roof extension and erect a larger single storey extension in its place to the southeast of the property. Extend at 1st floor level to southwest of the rear elevation and some alterations to the fenestration.

The proposals achieve a good standard of design, using materials which complement the existing materials. The ground floor extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The first floor extension will have one window looking south-east, but due to the existing outbuilding and high boundary treatments the overlooking is minimal and would only overlook long views of the bottom of the garden, rather than the private areas close to the property.

The scale and massing of both of the new extensions are not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will they have any impacts on either of the immediate neighbours.

Policy GP9, Sustainable Development, seeks to ensure all new development takes into account the use of energy and resources and any adverse impacts on the environment. There has been sufficient information provided with the application to comply with the requirements of this policy.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
