Conclusion/Brief comment:

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.

The proposed pergola adopts a good standard of design by virtue of its size and materials. The incorporation of solar panels is encouraged and supported under the provisions of Policy GP9.

Whilst the pergola will be sited south of the dwelling and positioned forward of the building line of the property (west elevation), the proposal will be screened by mature landscaping which lines the roadside boundary. It is noted that the established landscaping could be reduced in height and in either event the proposal

will not have a detrimental effect on the character of the area or visual amenity when considering the favourable consideration of householder development through Policy GP13.

Neighbour amenity will not be affected.

Sufficient information has been submitted that has taken into account the criteria of Policy GP9 (Sustainable Development).

Based on the above, the application is considered compliant with the relevant Island Development Plan policies; it is therefore recommended that planning permission be granted, subject to conditions.
